Rizky Nanda Praditia

AI Engineer | LLM Systems & Evaluation
Kendal, Central Java | +62 857 0103 4911 | rizkynandapr@gmail.com | LinkedIn | Github

SUMMARY

AI Engineer who ships production LLM systems. I built and deployed 15 client-facing agents on the Claude API, n8n, and Cekat for Indonesian SMBs, automating up to 80% of inbound customer conversations. My work covers RAG with hybrid retrieval, agentic workflows using function calling, and evaluation harnesses wired as CI gates that catch hallucinations before release. I care most about reliability: knowing why a system answered the way it did, and proving it with tests.

WORK EXPERIENCE

Cekat.AI **Tangerang, Indonesia**
IT Delivery *October 2026 – Present*

- Deliver production AI agents to business clients end to end: deployment, configuration, and handover on the Cekat platform.
- Build each client's system prompts and knowledge base, and set up the automation integrations that connect the agent to the client's own tools and workflows.

Aksoro (PT Aksara Juara Nusantara) **Yogyakarta, Indonesia**
AI Prompt Trainer & AI Engineer *June 2026 – September 2026*

- Built and deployed production AI agents for 15 SMB clients on the Claude API, Cekat, and n8n, automating up to 80% of customer communication; designed the system prompts and Knowledge Source retrieval that kept each agent accurate and in context.
- Built an automated QC pipeline that scores agent responses at scale and flags hallucinations, cutting manual QA time; debugged and tuned prompt logic to raise reliability in multi-turn conversations.

Damirich **Yogyakarta, Indonesia**
Database Administrator Intern *December 2023 – May 2024*

- Designed and maintained relational database schemas across 5+ core tables, supporting data normalization and system integration.
- Wrote and optimized SQL queries for data validation and extraction, ensuring data quality and consistency for downstream use.

Universitas Muhammadiyah Yogyakarta **Yogyakarta, Indonesia**
Assisted lecturers *September 2022 – July 2023*

- Mentored 30+ students in SQL query writing, indexing, and relational database design.
- Developed practice exercises covering joins, normalization, and query optimization.

SKILLS

AI & LLM: LLM APIs (Anthropic Claude, OpenAI), agentic workflows, multi-agent systems, function calling, prompt engineering, RAG, hybrid retrieval (BM25 + dense), LLM evaluation, LangChain, LLM fine-tuning
Vector Search: Qdrant, semantic search, BM25 + RRF
Engineering: Python (proficient), SQL (advanced), FastAPI, Git, Docker, pytest, CI, Langfuse
Front-end: React, Vite, JavaScript, Supabase
Automation: n8n, Cekat, API & webhook integration, workflow automation

PROJECTS

LegalitasAI - RAG Assistant with Citation Guardrail *Jul 2026*

- Built a RAG assistant that answers Indonesian small-business legal questions and cites the exact regulation article behind every answer. A validator checks each citation against its retrieved source before the answer ships; a bad citation gets one regeneration, then a refusal.
- Added status-aware retrieval that drops revoked regulations at the ranking stage instead of after top-k, lifting Hit Rate@5 from 63.6% to 81.8% and MRR from 0.40 to 0.71.
- Parsed scanned government PDFs with broken OCR into a clean structured corpus, then wrote a custom eval harness for retrieval quality, citation accuracy, and LLM-judge faithfulness, running as a CI gate (43 tests, 7 architecture decision records).

Technology / Tools: Python, FastAPI, BM25 + RRF, Qdrant, Claude API, Langfuse, Docker, pytest.

WhatsApp AI Chatbot for SMBs - Universal n8n Template *Jul 2026*
Built a reusable n8n workflow that turns a WhatsApp Business number into an AI customer service agent (product Q&A with memory, order detection to Google Sheets, owner alerts, lead follow-ups), with all client-specific values in one config node to cut onboarding to under 30 minutes. Open-sourced with full docs.

Technology / Tools: n8n, WhatsApp Cloud API, Claude API (Anthropic), Google Sheets, Webhooks, JavaScript.

ApplyIQ - AI Job Application Assistant *May 2026 – Jul 2026*
Automated resume-to-role matching and tailored cover-letter drafting: a user uploads a resume (parsed in the browser) and sets a target role, then an n8n LLM pipeline scores matches, writes each letter, and surfaces results on a live Supabase-backed dashboard with match-score meters and one-click copy.

Technology / Tools: React 19, Vite, pdf.js, mammoth, n8n, Supabase, LLM.

Clickbait Detector *March 2026*
Trained an LSTM on 32k balanced English headlines to flag clickbait, reaching 98% accuracy and 0.99 precision on the clickbait class. Deployed as a Streamlit app on Hugging Face Spaces for live testing.

Technology / Tools: Python, TensorFlow, Keras, LSTM, Streamlit, Hugging Face.

EDUCATION

Hacktiv8 Bootcamp **Jakarta, Indonesia**
Data Science Program *01/2026 - 04/2026*

Universitas Muhammadiyah Yogyakarta **Yogyakarta, Indonesia**
Bachelor of Informatics (GPA 3.43/4.00) *2021 – 2025*

CERTIFICATIONS

Anthropic
Al Fluency Framework & Foundations *Issued on May 2026*
Certificate: e97e2vkx2iba *No expiration date*

HackerRank
SQL (Advanced) *Issued on March 2026*
Certificate: DC228A29D2E1 *No expiration date*
